

## Technology Stack

Date	20-November-2022
Team ID	PNT2022TMID14617
Project Name	IoT Based Safety Gadget for Child Safety Monitoring & Notification
Maximum Marks	4 Marks

### Technical Architecture:

## **Components & Technologies:**

<b>S.No</b>	<b>Component</b>	<b>Description</b>	<b>Technology</b>
1	User Interface	The communication protocol being used in the proposed solution might act as an interface the way like Wi-Fi, Bluetooth and ZigBee	MIT app
2	Application Logic	The data to be collected and sent to the authenticator's(parent) via GSM providing the GPS coordinates to easily locate access and monitor the child	IBM Watson STT service, python etc
3	Database	Data to be segregated and secured in the form of relational DBMS	MySQL
4	Cloud Database	IBM	IBM Cloudant
5	File Storage	File storage requirements	IBM Block Storage or Other Storage Service or Local Filesystem
6	External API-1	To access the children location	GPS location monitoring etc
7	Infrastructure (Server / Cloud)	Application Deployment on Local System / Cloud Local Server Configuration	Cloud Foundry

### **Application Characteristics:**

<b>S.NO</b>	<b>Characteristics</b>	<b>Description</b>	<b>Technology</b>
1	Open-Source Frameworks	The proposed solution being framed in the form an android app providing the end user an easy surveillance of their children (preferably users are parents)	UI/UX design development
2	Security implementations	The developed application should be accessible in the way it can only respond to the comments of the relevant users	Encryptions, IAM Controls
3	Scalable Architecture	The app format comes the way easier to handle end operate	Not Yet Determined
4	Availability	The developed solution tends to be available in the market at any time	Not Yet Determined
5	Performance	Highly proper and betterment functionalities are to be ensured in the designed solution	Not Yet Determined
